PRODUCT DATA SHEET

Raize Orion Compliance

Fourteen compliance frameworks. One source of truth.

AI-assisted, multi-framework GRC — now with AI governance built in.

14	19	1,700+	99.5%
Frameworks supported	Evidence connectors	Pre-mapped controls	Uptime SLA

Raize Orion Compliance is a multi-framework GRC platform for SaaS scale-ups. One workspace for ISO 27001, SOC 2, NIST 800-53, GDPR, HIPAA, PCI DSS, ISO 22301, NIS2, Cyber Essentials and IASME Cyber Assurance - plus a four-framework AI-governance line (ISO/IEC 42001, the EU AI Act, the NIST AI RMF, and the Nigeria CBN AI/AML governance pack) - with automated evidence collection from 19 cloud, identity and observability sources, AI-assisted policy authoring, a public Trust Center, and an auditor portal that does not fight you. Built UK-side with EU data residency.

Who this is for

- SaaS companies in the 10-500 employee band entering or maintaining a compliance programme
- Compliance consultants needing a multi-tenant tool to operate audits across clients
- In-house security leads who want to demonstrate continuous compliance to customers + the board
- Buyers replacing Vanta or Drata to consolidate cost or to add HIPAA / PCI DSS / NIST 800-53 coverage

Book a 30-minute demo

sales@raizehq.dev - +44 7350 160740 - raizehq.dev

Why teams choose Raize Orion

Most GRC tools force you to pick a single framework, then pay-per-add. Raize Orion ships twelve frameworks - including a dedicated AI-governance line - cross-mapped at the control level so a single piece of evidence satisfies every framework it touches. Add EU data residency, AI-assisted authoring, and sales-led pricing that scales with team shape rather than seat count, and the build-vs-buy maths flips.

Seven things that matter to buyers

Multi-framework, cross-mapped

Every control is pre-mapped across ISO 27001 Annex A, SOC 2 TSC, NIST 800-53, HIPAA Security Rule, PCI DSS v4.0.1, GDPR / UK GDPR articles, ISO 22301 clauses 4-10, NIS2 Art. 21 measures, Cyber Essentials themes, IASME Cyber Assurance themes, plus ISO 42001 and CBN AI/AML. Adopt a policy once, satisfy every framework that touches it.

AI governance built in (ISO 42001 + CBN AI/AML)

Govern your AI the way you govern security. ISO/IEC 42001 (67 controls, the AI Management System standard) and the Nigeria CBN AI/AML governance pack (29 controls) ship first-class - with an AI System Register, AI impact assessments (AIIA), model-validation reminders, and one-click promotion of AI risks. A governance + evidence layer, not a detection engine. Included with Enterprise; an add-on on Starter / Growth.

Automated evidence collection

19 connectors (AWS, GCP, Azure AD, GitHub, Okta, Auth0, Google Workspace, ServiceNow, CrowdStrike, Snowflake, Slack, Datadog, Jira, Cloudflare, Sentry, BambooHR, Jamf, Kandji, plus a generic REST/JSON connector for in-house systems) pull control evidence on a daily cron, written into a tamper-evident audit log.

AI-assisted policy authoring

Generate first-draft policies (Information Security, Acceptable Use, Incident Response, etc.) tuned to your industry + risk profile. Edit + adopt + version-control.

Public Trust Center + Auditor Portal

Bundled at base tier. Share scope-bounded read-only links with prospects + external auditors without an NDA negotiation. Customer self-service evidence in days, not weeks.

EU data residency + UK incorporation

All customer data hosted in EU-West-1 (AWS Frankfurt). Processor under UK GDPR. Real wedge vs US-built tools when winning EU + FS deals.

Realtime drift alerts to Slack

Connector findings at or above your configured severity threshold post to your Slack channel within seconds - the "Compliance OS" pattern, not a once-a-day digest.

Frameworks supported

Fourteen frameworks shipped first-class. Core allowances scale per plan (3 / 6 / all 12 core); the four-framework AI-governance line (ISO 42001, EU AI Act, NIST AI RMF, CBN AI/AML) is included with Enterprise and available as an add-on on Starter / Growth. Cross-mapped at control level so each piece of evidence satisfies every framework it touches.

ISO 27001:2022
International (ISO/IEC) - 93 Annex A controls + 22 management clauses
Use case: EU customers; tender requirement; ISMS certification path.

SOC 2 (TSC 2017)
AICPA - CC1-CC9 + A1 + C1 + PI1 + P1 (201 criteria)
Use case: US enterprise customers; vendor security assessments.

NIST 800-53 Rev 5
US Federal - ~1,061 controls across 20 control families
Use case: US federal contracting; FedRAMP path; depth + rigour benchmark.

GDPR / UK GDPR
EU + UK Regulation - 50 article-mapped controls + DPIA + RoPA + DSR
Use case: Any EU customer data; processor + controller workflows.

HIPAA
US Federal (Healthcare) - 52 sec. 164 specifications + BAA workflow
Use case: Healthcare customers; BAA-required vendors.

PCI DSS v4.0.1
PCI SSC - 52 controls across 12 requirements + Req. Tab
Use case: Payment-card-handling customers; merchant + service-provider variants.

ISO 22301:2019
International (BCMS) - 37 requirements across clauses 4-10 + BIA + RTO/RPO
Use case: Business continuity; tender requirement; supply-chain assurance.

NIS2 ((EU) 2022/2555)
EU Directive - 32 reqs - Art 21 ten measures + Art 23 reporting clock
Use case: EU essential / important entities; 24h / 72h / 1-month reporting.

Cyber Essentials / Plus
UK Government (Danzell v3.3) - 42 controls across five technical themes + CE Plus verification
Use case: UK public-sector contracts; baseline UK cybersecurity hygiene.

IASME Cyber Assurance
UK Standard (risk-based) - 61 requirements across 13 themes (incl. Cyber Essentials)
Use case: UK SMEs; risk-based assurance + GDPR + business continuity bundled.

ISO/IEC 42001:2023
International (AIMS) - 67 controls, 16 categories (clauses 4-10 + Annex A)
Use case: Responsible AI governance; AI System Register + impact assessments.

CBN AI/AML
Nigeria (governance pack) - 29 controls across 5 categories (governance + evidence)
Use case: AI / model-risk governance evidence for CBN expectations - not a detection engine.

EU AI Act
EU Regulation 2024/1689 - 53 controls across 11 obligation areas (risk-tiered)
Use case: EU AI Act readiness; prohibited -> high-risk -> GPAI; governance + evidence, not legal conformity.

NIST AI RMF 1.0
US (NIST AI 100-1, voluntary) - 72 Core subcategories (Govern / Map / Measure / Manage)
Use case: Voluntary AI risk governance; pairs with the AI System Register + impact assessments.

Evidence connectors

19 connectors auto-collect compliance evidence on a daily cron. Findings tagged to the framework controls they satisfy (ISO 27001 / SOC 2 / NIST 800-53 / HIPAA / PCI / GDPR / ISO 22301 / NIS2 / CE / IASME / ISO 42001 / CBN AI/AML), framework-gated against your active programmes.

Connector catalogue (19)

Source	What we evidence	Control codes (sample)
AWS	IAM users + MFA, S3, KMS, CloudTrail	CC6.1, CC6.8, A.5.16, A.5.18
GCP	IAM, service-accounts, KMS keys, audit logs	CC6.1, A.5.15, AU-2
Azure AD	Conditional access, privileged roles	CC6.1, A.5.18, AC-2(7)
Okta	Password policy, MFA enrolment, admins	CC6.2, IA-2(1), A.5.17
Auth0	Tenant settings, MFA, rule inventory	CC6.2, A.5.17, IA-2
Google Workspace	2-step verification %, super-admins	CC6.2, IA-2(1), 164.312(d)
GitHub	Branch protection, MFA, Dependabot	CC8.1, A.5.17, AC-2
ServiceNow	Change-request volume, incident age	CC8.1, CC7.4, A.5.26, IR-4
CrowdStrike	Endpoint coverage %, agent versions	CC6.8, A.8.7, SI-3
Snowflake	Network policies, MFA %, dormant users	CC6.2, CC6.6, IA-2(1), SC-7
BambooHR	Joiner / mover / leaver lifecycle	CC1.4, A.6.1, PS-4
Jamf	macOS fleet posture (disk encrypt., patches)	A.8.7, A.8.8, SI-2
Kandji	macOS fleet posture (zero-touch, MDM)	A.8.7, A.8.8, SI-2
Slack	2FA scope, workspace reachability	CC6.2, A.5.17
Datadog	Monitors, log retention, alerts, SLOs	CC7.1, CC7.2, AU-11, A.8.15
Jira Cloud	Auth + project inventory	CC8.1, A.5.16
Cloudflare	API-token scope, zone inventory	CC6.1, A.5.16
Sentry	Project inventory, error retention	CC7.3, A.5.25
Generic REST/JSON	Custom in-house source mapped to control codes	Any (declared per connector)

Framework-gated deep checks + realtime drift alerts

Each connector runs framework-gated deep checks based on your organisation's enabled frameworks - so a PCI-only org sees PCI-relevant findings, not noise. A control-code relevance guard ensures evidence is only mapped to controls that exist in your active catalogues. Configure a Slack webhook + severity threshold per organisation: findings at or above the threshold post to your channel within seconds, with control codes + a deep-link back to the evidence record. Included at every plan tier.

Feature matrix

Programme management

- Multi-framework control library (1,600+ pre-mapped)
- Custom controls + per-tenant overlays
- Cross-framework control mapping
- Maturity model (CMMI-aligned)
- Statement of Applicability (SoA)

Evidence + automation

- 19 evidence connectors (daily auto-collect)
- Framework-gated deep checks + relevance guard
- AI evidence scoring + relevance match
- Manual evidence upload + tagging
- Realtime drift alerts to Slack

Policy + AI

- 52 policy templates (multi-framework)
- AI-assisted policy authoring + revision
- Policy versioning + adoption workflow
- AI policy gap analysis
- Per-org branded DOCX export

Risk + DPIA + AI governance

- Risk register with CVSS-aligned likelihood x impact
- DPIA (GDPR Art. 35) + ROPA (GDPR Art. 30)
- AI System Register (ISO 42001) + AI impact assessments
- CBN AI/AML governance pack + model-validation reminders
- Vendor risk assessments + questionnaires

Audit + reporting

- Internal audit + AOC findings + CAPA
- Auditor portal (scope-bounded tokens)
- Audit log export (CSV) - lifetime + 30d retention
- Board pack PDF generator
- Per-framework attestation reports

Trust + sales support

- Public Trust Center per organisation
- Customer-facing questionnaire response library
- CAIQ v4 + SIG Lite 2024 + HIPAA BAA templates
- Sub-processor disclosure + change notifications
- Status page (commits to RTO 4h / RPO 1h / uptime 99.5%)

Plans

Three plans sized for different team shapes. Auditor Portal, Trust Center, audit log and the full evidence-connector catalogue are available across plans. Pricing is sales-led - email sales@raizehq.dev for a same-day quote tailored to framework scope, rollout timing and team size.

Starter

Pick 3 frameworks, small team.

- 3 frameworks (your choice)
- 5 users
- 1 evidence connector
- Auditor portal + Trust Center
- Custom controls
- AI governance available as add-on

Growth (most popular)

Full GRC stack + AI.

- 6 frameworks (your choice)
- 25 users
- All 19 evidence connectors
- AI scoring + policy + chat
- Up to 5 webhook endpoints
- AI governance available as add-on

Enterprise

All frameworks + dedicated CSM.

- All 14 frameworks
- AI governance included (ISO 42001, EU AI Act, NIST AI RMF, CBN AI/AML)
- Unlimited users + AI
- SCIM provisioning (Okta, Azure AD)
- Custom DPA on request
- Dedicated CSM + SLA

For a quote sized to your team and framework scope, email sales@raizehq.dev or call +44 7350 160740. Billing is GBP-default with USD ($) and EUR (€) on request. No long-term commitment - cancel any time from the in-app Customer Portal.

Security + compliance posture

Our own commitments

Commitment	Value
Uptime SLA	99.5% (rolling 30d)
RTO (Recovery Time Objective)	4 hours
RPO (Recovery Point Objective)	1 hour
P1 incident acknowledgement	30 minutes
Customer breach notification	Within 72 hours (UK GDPR Art. 33)
Audit log retention	Lifetime of contract + 30 days + 7y off-site
Customer data deletion (on request)	Within 30 days + deletion certificate
Data residency	EU-West-1 (AWS Frankfurt)
Encryption at rest	AES-256
Encryption in transit	TLS 1.2+ (1.3 preferred); HSTS preload
MFA enforcement	Mandatory on every user role

Compliance status

Raize Technologies Ltd holds a complete day-1 SOC 2 Type II evidence pack (17/18 items prepared; DBS check + pen test in flight). Type I targeted Q3 2026, Type II report Q1 2027. ISO 27001 readiness package complete; certification body engagement scheduled. UK GDPR + DPA in force at https://raizehq.dev/dpa.

Sub-processors

- Supabase (Postgres + Auth + Storage + Vault + Edge Functions) - EU-West-1
- Vercel (CDN + edge runtime) - EU regions
- Stripe (billing) - EU + global, PCI Level 1
- Resend (transactional email) - US/EU
- Anthropic (AI features - policy authoring, scoring, chat) - US, DPA signed
- Voyage AI (embeddings for evidence semantic search) - US, DPA signed
- Sentry (error monitoring) - EU region
- Cloudflare (DNS only) - global
- GitHub (source control) - US

Full sub-processor disclosure + change notifications: raizehq.dev/trust/raize. 30-day advance notification on material changes.

How Raize compares + onboarding

vs Vanta / Drata at a glance

Capability	Raize Orion	Vanta	Drata
Frameworks shipped first-class	14	6 + add-ons	6 + add-ons
HIPAA + PCI DSS bundled	Yes	Add-on	Add-on
NIS2 + ISO 22301 + CE + IASME	Yes	No	No
Public Trust Center	Bundled	Bundled	Add-on
Realtime drift alerts	Yes	Yes	Yes
EU data residency	Native	US (GDPR opt-in)	US (GDPR opt-in)
AI policy authoring	Bundled	Add-on	In beta
Sales-led pricing + UK-based team	Yes	No	No

Onboarding - what to expect

Day 0 Book a 30-minute demo at sales@raizehq.dev or +44 7350 160740; choose 3 (Starter), 6 (Growth) or all 12 (Enterprise) frameworks - add the AI-governance line (ISO 42001 + CBN AI/AML) on any plan.

Day 1 Walk through the per-framework gap analysis - pre-populated with the controls likely already covered by your current stack. Connect first evidence source (typically Okta or GitHub) in under 10 minutes.

Day 3 Adopt baseline policies (Info Sec, AUP, IR, BCP, Vendor Risk, etc.) from the 52-template library via the AI-assisted authoring flow. Edit, route through your approver, mark adopted.

Week 1 Populate Risk + Vendor + Asset registers; seed the audit log; configure the Trust Center for your prospects to consume.

Week 2 Schedule your first auditor portal share; commission a pen test if you do not already have one; book the kick-off with your chosen audit firm.

Month 2 Cron-driven evidence rolls in daily across all 19 connectors; Slack alerts surface drift; quarterly synthetic audits keep the programme honest.
